Greater Than a Tourist: Unlocking the Secrets of the Brazilian Amazon Rainforest

The Our Book Library rainforest is the largest and most biodiverse rainforest in the world, covering an area of over 5.5 million square kilometers (2.1 million square miles). It is home to an estimated 10% of the world's known species, including many that are found nowhere else on Earth. The rainforest is also a vital source of oxygen and water for the planet, and it plays a crucial role in regulating the global climate.

In recent years, the Our Book Library rainforest has come under increasing threat from deforestation, mining, and other human activities. These threats are putting the rainforest's biodiversity, climate regulation services, and other vital functions at risk.
