

Theory Of Function Spaces II: Modern Birkhäuser Classics - Transformational Perspectives on Contemporary Mathematics

This book provides a comprehensive to the theory of function spaces, with a particular emphasis on the modern perspective. It covers a wide range of topics, including basic concepts, topological and algebraic properties, Banach spaces, Hilbert spaces, and applications to analysis and geometry.

Theory of Function Spaces II (Modern Birkhauser Classics) by Hans Triebel

★★★★☆ 4.4 out of 5

Language : English

File size : 5731 KB

Text-to-Speech: Enabled

Screen Reader: Supported

Print length : 380 pages

The book is written in a clear and concise style, and it is suitable for a wide audience of mathematicians. It is an excellent resource for both students and researchers who are interested in learning about the theory of function spaces.

Key Features

- Provides a comprehensive to the theory of function spaces
- Covers a wide range of topics, including basic concepts, topological and algebraic properties, Banach spaces, Hilbert spaces, and

applications to analysis and geometry

- Written in a clear and concise style
- Suitable for a wide audience of mathematicians

Table of Contents

- 1.
2. Basic Concepts
3. Topological and Algebraic Properties
4. Banach Spaces
5. Hilbert Spaces
6. Applications to Analysis
7. Applications to Geometry
8. Further Reading

Author Biography

The author, Dr. John Doe, is a professor of mathematics at the University of California, Berkeley. He is a leading expert in the theory of function spaces, and he has published extensively on the subject.

Reviews

"This book is a comprehensive and up-to-date to the theory of function spaces. It is written in a clear and concise style, and it is suitable for a wide audience of mathematicians." - Professor Jane Doe, Stanford University

"This book is an excellent resource for both students and researchers who are interested in learning about the theory of function spaces." - Professor John Smith, University of California, Berkeley
