# Word Problems: Math

What is the question?

How many different ways can you arrange 24 desks so that each row has the same number of desks?

What is the essential information?

There are 24 desks

Each row must have an equal number of desks.

What information is not needed?

The number of students in the class.

What operations will I use?

Multiplication and Division

Does my answer make sense?

Yes, because I drew a picture and there are 24 desks with the same # of desks in each row.

Can I draw a diagram of the problem?
